

Solar is a growing business. So is ours. Suntrace is looking for:

SENIOR PROJECT ENGINEERS (M/F/X)

both as freelancers and under fixed employment contracts.

Suntrace is a solar power consulting company founded in 2009 and headquartered in Hamburg, Germany. Our expertise covers the full project life cycle of solar power projects from early project development to project implementation and operation. Our clients are institutional and development finance institutes, independent power producers, project developers as well as governmental and research institutions including, for instance, the World Bank Group, KfW, GIZ, ADB, MASEN, Fraunhofer or MASDAR. We are specialised in emerging markets and developing economies and have carried out over 100 projects in over 40 countries worldwide.

Your ideal profile:

- More than five years of working experience in one or more of the following:
 - Design and Technical Due Diligence of solar plants
 - Mini grids, hybrid technologies, battery systems
 - EPC tendering and contractual negotiation
 - Construction supervision & commissioning
 - Solar plant operation & maintenance
- Language priority: English, French, German
- International experience, ability to travel, also for extended periods
- Self-motivated, goal oriented, team player
- Master's degree in engineering, preferably related to energy, mechanical or electrical
- Willing to relocate to Hamburg (under fixed contracts)

Job description:

Become an integral part of the Suntrace team as project manager focusing on our advisory activities for solar projects around the globe (Asia, Africa, Europe, MENA). Assume construction supervision responsibilities, support site visits, owner's engineering activities, inspection and due diligence of exciting projects or under construction. Support Sales activities as needed. Start of Work: latest Jan 2020, earlier date appreciated

Please send your CV including project and task references as well as employment certificates to hr@suntrace.de.
