

Press Release – 18 January 2016

Suntrace GmbH, Hamburg – On behalf of clients, Suntrace is searching investment opportunities in PV projects with long term Power Purchase Agreements. Projects can have maturity levels close to construction or under development and need to match minimum sizes of ca. 10 - 15 MW, sound risk profiles and geographic criteria, among others. Suntrace offers leading project management experience as well as technical and financial resources to help projects achieve bankability and attractiveness to investors.

Suntrace GmbH, Germany is an international solar power expert. The company covers the entire project life cycle from development, financing and construction to operation, with a clear focus on solar in emerging markets. Suntrace is privately owned, registered in Germany with representations and subsidiaries in Spain, Chile, India and South Africa. Project and client references span over 3000 MW of solar power projects in over 25 countries. In Africa, Suntrace has been working on projects in Tunisia, Morocco, Kenya, South Africa and Namibia with overall projected project capacity in excess of 1 GW solar.

Four HelioScale measurement stations installed in Maldives

In cooperation with our partner Geomodel Solar, Suntrace has installed four HelioScale stations in Maldives. The measurement campaign is part of the World Bank Group funded ESMAP project “Renewable Energy Resource Mapping for the Republic of Maldives”. The project focuses on implementing longterm and sustainable solar resource monitoring program and the validation of solar resource models.
