

Solar Development Support

What we do

We assist in all phases of the project development chain: origination, feasibility, project qualification, finance and construction. Our services cover the areas solar resource, technology and engineering as well as economics and finance.

Suntrace provides essential elements to develop solar power projects. From solar resource assessment, engineering, project management to finance, Suntrace offers solutions to complement your own capabilities and resources to efficiently achieve your project objectives. Our approach is independent and allows to optimise key project parameters such as equipment or financial options to create competitive projects with decent returns. We can work with all leading technologies for both Concentrating Solar Power (CSP) as well as Photovoltaic (PV) power plants.

Suntrace has a strong track record as independent expert for solar energy projects in emerging solar markets in Asia, Africa, the Middle East and Northern Africa (MENA) as well as in Latin America. In total, the company has provided support to more than 50 solar power projects with up to 2500 MW capacity in over 20 different countries.

Established in 2009, Suntrace's headquarter is located in Hamburg, Germany. Suntrace has a network of branch offices and cooperation partners in most relevant markets of the sunbelt. The team counts highly specialized professionals from North and South America, Asia, Africa and Europe.
